# Navigating Early-Career Decisions for Residents and New Graduates: Success in Psychiatry Practice

- AAPM&R is hosting 2 virtual Early Career courses in 2021!
- These unique virtual conferences are intended to help psychiatrists in-training and newly graduated psychiatrists navigate their career paths.
- Learn more about the courses [here](#).

*“This course will be a great learning opportunity for those transitioning into their new role as a physician. You’ll gain insights to guide you in making important career decisions, and have the chance to network with other residents, early-career psychiatrists and faculty from across the country. We hope you feel empowered after attending this course – to take the next step in your PM&R career with confidence!”— Sarah K. Hwang, MD, FAAPMR (Course Director)*

*“In residency, practical aspects of our specialty and medicine in general are rarely taught. After we graduate residency, we are expected to navigate our careers with little direction. It is my hope that attendees learn important practical pearls to help them better maneuver their careers.”—Francis Lopez, MD, MPH, FAAPMR (Course Director)*

# Get In Front of Residents and Recent Graduates
