

OUR VISION FOR THE FUTURE

ADVANCING

and HOW WE'LL GET THERE

PHYSIATRISTS WILL BE...

PM&R BOLD

Indispensable leaders in directing rehabilitation and recovery, and in preventing injury and disease

The essential medical experts in value-based evaluation, diagnosis, and management of neuromusculoskeletal and disabling conditions

Vital in optimizing outcomes and function early and throughout the continuum of care

Facilitate Learning Collaboratives as a way for members to connect with their peers

Address barriers including the need for data, specialty identity and value, leadership training and workforce limitations

Engage our 600+ member volunteers to work toward our vision for the future of physiatry

Define and promote the core services, role, and value of the physiatrist

Make our voices heard on legislation and policy issues that influence patient care, reimbursement, and scope of practice

AND MORE!

Like a Track & Field competition, PM&R's different practice areas are each working in their unique way toward the overall team goal

MUSCULOSKELETAL CARE

Physiatrists are overcoming **HURDLES** to become Primary Care's frontline partner for non-emergent musculoskeletal care to provide timely, coordinated, and cost-effective care.

PEDIATRIC REHABILITATION MEDICINE

Physiatrists are the essential experts helping children with acquired and congenital disabilities optimize function and make the **JUMP** across the care continuum, life transitions, and into the community.

CANCER REHABILITATION MEDICINE

Physiatrists are **VAULTING** into a leadership position as an essential and integrated part of interdisciplinary cancer care teams and developing the recognized standard of care in national oncology treatment.

REHABILITATION CARE CONTINUUM

Physiatrists are leading the **RACE** across the acute and post-acute care continuum, developing care pathways, and co-managing models to improve outcomes and value to health systems.
