

NEW Wiley Online Library app to replace journal apps

To keep you connected with your society's journal **and** let you access content from other journals we publish, we've launched the Wiley Online Library app, which now replaces *PM&R*'s journal app. You can still access the same features and benefits as before - and more! Download the app now in [iOS](#) or [Android](#) version.

What's changed?

Instead of accessing *PM&R* through the old standalone journal app on your phone, you should now use the Wiley Online Library app. The old standalone journal app will no longer be updated.

Keep up-to-date with the latest content from the society's journal through the new app, and access all other Wiley journals - all in one place. See below for instructions to download the app.

Key features and benefits

- **Easy** access to **more** content **on the go**: Browse 1600+ journals by society, subject or by journal title, all in 1 place
- Build your own **customized research feed** from your favourite journals and topics
- Receive **notifications** when new issues are released
- Save research and journal issues to your device for **offline reading**
- Log in for full access or **browse free content**
- **Coming soon**: cut out the noise with our **single society focus mode**

Get access with 3 quick steps

1. **Search 'Wiley Online Library'** in your app store and **download** to your device
2. **Log in** to the app using your **society member details** (when applicable) or your **Wiley Online Library account details**
3. **Search for content** by journal, society or subject and **favourite your society's journal** for easy access in future
