aapm&r Registry

What

AAPM&R's Registry is a single repository of data which will aid the specialty by guiding efforts to reduce burnout, defend scope of practice, demonstrate value and provide data to improve patient care.

How

AAPM&R's Registry success will come from harnessing traditional EMR data with Patient Reported Outcomes data. AAPM&R's Registry is built on ArborMetrix RegistryX, which leverages healthcare interoperability standards to intake data and transform that data into real-world evidence through smart analytics and intuitive and flexible reports.

Why

Decision-making demands data – factual evidence that your skills and services are deserving of a patient's patronage, an institution's referral, or a payer's reimbursement.

The accurate documentation of rehabilitation through data is an effort that will involve all of physiatry, together, and it starts with AAPM&R's Registry.

Participating inAAPM&R's Registry allows you to:

- ☑ **Benchmark your practice**
- ☑ **Improve patient care**
- ☑ **Manage patient populations**
- ☑ **Join a community of quality improvement**

AAPM&R's Registry is initially launching two data collection programs centered on ischemic stroke and low-back pain conditions and will expand to other PM&R clinical areas.

Early Adopters

AAPM&R's Registry would like to thank the following participating sites for being early adopters of the Registry:

- 👤 Brooks Rehabilitation
- 👤 Carolina Neurosurgery and Spine Associates
- 👤 Lifespan Physician Group
- 👤 Rusk Rehabilitation at NYU
- 👤 Shepherd Center
- 👤 Shirley Ryan AbilityLab
- 👤 Vanderbilt University Medical Center
